Case Study

LOCATION OF JOB: Black Mountain, QLD
 CLIENT: Aurizon
 CONTRACT VALUE: ~\$3.6M

QCCS were engaged to complete various remediation works at Black Mountain, following the widespread damage caused by Tropical Cyclone Debbie. These works were executed across multiple stages, including 9km of remediation works to the Black Mountain Access Road. QCCS were contracted to complete asphalt surfacing, drainage, road furniture and kerb and channel removal. Additional remediation works completed by QCCS included removal of flood debris and installation of slope protection. Restricted access to some of the slope protection sites required reinforcement to be freighted in by helicopter. The successful completion of these projects restored safe access, reiterating QCCS' core value, "whatever it takes, safely and efficiently".
