# Case Study

LOCATION OF JOB: Archibald Street,  
Paget, Mackay QLD

CLIENT: Rocla Pipeline Products

CONTRACT VALUE: \$1.05M

The construction of a new concrete prestressing bed at Rocla Pipeline Products' Mackay facility involved earthworks, construction of a compression slab, cable tray slab, storage slabs and crane rail foundations, plus installation of dewatering channels and electrical pits. QCCS designed and constructed the tilt-up concrete panels and electrical pits. This project faced its share of challenges, with works occurring during the wet season. Professional management by QCCS saw this project completed within the required time frame of 3 months.
